Service excellence is our heart & soul, the critical element in our client relationships is how we first meet our commitment, and then surpass them to deliver exceptional value.

Main Lines of Business

The diagram features five concentric circles of varying sizes, each representing a business line. The circles are arranged with 'Data Center & Network Infrastructure' at the top left, 'Low Current Systems' at the top right, 'Cyber & network Security' at the bottom right, 'Turn Key Solutions' at the bottom left, and 'V-SAP Solution' in the center. Each circle has a dark blue center, a medium blue middle ring, and a light blue outer ring. Thin blue lines radiate from the top edge of the image towards the circles.

V-SAP

VERIFIED SERIALIZATION,
AGGREGATION AND PRINTING

V-SAP System is the complete software solution set designed and built to ensure complete compliance with global pharmaceutical standards and to meet healthcare stakeholder's serialization and aggregation requirements on the basis of GS1 standards and SFDA tracking regulations to manage track and trace of drug packages. V-SAP, fulfilling all the SFDA regulations, developed based on GS1 Standards, and verified by GS1 Saudi Arabia.

MAIN FEATURES

- ▶ Creation of nomenclatures (Packaging levels, templates, lines, devices (scanners and printers).
- ▶ Configuration of all packaging lines and devices (Printers, scanners, ..etc) on your site.
- ▶ General configuration of your software solution by control all variables (Theme, colors, ..etc).
- ▶ Integrated with GS1 Saudi Arabia databases (Master data, GDSN, GLN, ..etc).
- ▶ User profiling and access management with different roles and permissions.
- ▶ Easy-to-use and with minimal operator involvement to avoid human error.
- ▶ Import and Export functionalities.
- ▶ Monitoring dashboard for all processes, operations, work orders, and workers.
- ▶ Continuous development and product innovation.
- ▶ Works with a wide range of barcode readers.
- ▶ Centralized management possibility for all serialization and aggregation modules.
- ▶ User-friendly interface: easy and intuitive.
- ▶ GS1 Standards compliance.
- ▶ GMP compliance.
